

# Air PBX

## URL Voice Trunk for AI Assistant and Auto Live Call Routing

Direct to PBX/Telephone/AI calling | Runs on your Web Network | No need for Trunk number | AI powered | Portal Friendly

### Impress your Customer

Provide an always-available telephone AI assistant designed to handle your customers' most common questions and requests. The AI can understand and interpret callers' language and intent, delivering accurate responses and seamlessly routing calls to live agents when necessary.

### Manage your manpower

Create a responsive AI assistant supported by a small, efficient team using Air PBX URL Trunking. This setup lets you build live and virtual support teams that customers can reach through the AI assistant, ensuring fast, high-quality service. By handling routine inquiries and directing complex issues to the right agents, the AI reduces staffing needs and lowers operating costs while helping companies better manage local manpower.

### What is Air PBX URL Trunk?

A newly patented technology simplifies voice trunk connectivity by using URL-based calling to link any device to any corporate PBXs, telephones, and personnel resources, thereby facilitating to create more business opportunities and improved customer satisfaction. AIR PBX does not require a mobile app for callers to connect. Calls can be initiated using a QR code or a URL, so a phone number is not really necessary.

### Other Features

Multi lingual AI assistant and trainable, location based service for emergency, Map dialing, Payment integration, 3rd Party API integration, Voice to SMS, Voice to Email, Custom Call Portal, Custom Greetings, and web portal friendly when you want to build your portal Calling Directory.
