

Benefits of eHotline to your Community

Cloud based Emergency Hotline system and more...

Quick access to emergency help and reporting for the community. No toll fee. Simply scan the QR code or visit the URL to connect with the community's emergency hotline and reporting center. All calls are geo-tagged and validated for caller identity and address.

- Hotline Help Desk** - Geo Location emergency voice call service for immediate response to emergencies.
- On line Complaint/ Reporting** - Report concerns: photos, videos, and details of issues like public safety, disturbances, or general services. Get a chronological record of your report and see its progress online.
- Alerts/Notification** - Send targeted messages to specific groups based on profiles like age, gender, location, occupation, and status. Receive alerts, notifications, and invitations on public safety, general information, and community services.
- Donation/Claims Scheduler** - Manage donation distribution with automated scheduling and validation. Unique reference numbers and profile matching ensure accurate recipient tracking, with automated SMS notifications for confirmation and progress updates.
- Responder Management** - Streamline emergency response with real-time geo-location mapping and detailed info on responders' devices. Supports multiple types of responders, tracking events from acceptance to arrival for efficient response times.
- Local Skills Directory** - eHotline leverages its database to build pools of credible local talents and skills per community. This platform enables ordering, contracting, and rating of reliable skills, creating jobs and promoting local labor force growth.
